STUDEBAKER PARTS AND ACCESSORIES SIGN LETTERS

After an absence of more than 50 years, the wooden letters used in the parts department of Studebaker dealers and factory depots are again available. These signs were first used in the late 1930s and continued through the early 1950s. As the originals, the letters are cut from 3/4-inch thick plywood. The original shapes were scanned, digitized, and recreated in a computer file. The plywood was then cut with a numerically-controlled laser to achieve smooth edges, sharp corners, and to reproduce every detail. High-quality maroon enamel, matched to the original color, was used to paint the new letters, though they are recommended for indoor use. The words may be arranged to cover 14-16 feet along a wall or may be grouped vertically to make a more compact sign.

STUDEBAKER is in letters about 6-1/2 inches tall, all of the other letters are 3-1/8" tall. This sign is the perfect accompaniment for your garage, den, or Studebaker dealership.

See www.studegarage.com/sign.htm for more pictures and history.

Available for immediate shipment at \$400.00 per set. Shipping weight: 7 lbs.

U.S. Parcel Post \$15.00 in the U.S. Call or email for other shipping methods or countries. We accept PayPal or you may use a credit card through my PayPal account.
